\$ 12.99

2002 REVIEWS

• **Dr. Abram Hoffer, senior editor of the *Journal of Orthomolecular Medicine* –**

"Sealey developed a practical guide for patients, families and caregivers. I think this book could be a model for anyone who is ill, especially people who cannot find quality care ... I recommend this book, even to medical students and psychiatrists in training."

• **John McManamy, editor of *McMan's Depression and Bipolar Weekly* –**

"After [decades] of struggling with bipolar II, Bob ... researched natural therapies and ... restored his mental health. Bob describes his journey to recovery."

• **Pat Young, editor of *Vitality* –**

"It took Robert Sealey nearly 30 years of health problems, misdiagnosis and substandard care to reach a diagnosis of bipolar II mood disorder ... A depression survivor suggested he try orthomolecular medicine. Orthomolecular treatment opened up a route to wellness for Sealey. Out of this has come a book on his experience and recommended tools to finding appropriate care for both patient and caregiver."
